

Data Transparency Project Measures

As part of the Data Transparency Project, clinics will share the data they have for the measures below. Through this collaborative, clinics all across the state will meet to discuss data and share best practices as they work to improve these measures.

For consistency, clinics will align their reports with the specifications for Oregon’s Coordinated Care Organization incentive measures. For this project, we will refer to CCO benchmarks as well as Healthy People 2020 benchmarks.

Data Transparency Measure	Measure Definitions	2017 Coordinated Care Organization Benchmarks*	HRSA National Quality Benchmarks*
Colorectal Cancer Screening % of patients aged 50-75 who have had appropriate screening for colorectal cancer	UDS Measure Specifications (page 100)	50.8%	35%
Depression Screening % of patients 12 years and older with a positive depression screen and a documented follow-up plan	UDS Measure Specifications (page 102)	52.9%	39%
Diabetes Poor Control % of patients aged 18-75 with diabetes whose last A1c result was > 9% or who had no test	UDS Measure Specifications (page 117)	19%	16%
Emergency Department Utilization Emergency department utilization for Medicaid patients (member month denominator)	CCO Measure Specifications * <small>*Clinics/OPCA will coordinate with CCOs to receive data</small>	42.9/1,000 Member Months	N/A
Hypertension % of patients aged 18-85 with hypertension where their last blood pressure reading was considered controlled (<140/90)	UDS Measure Specifications (page 116)	69%	61%
SBIRT Screening % of patients 12 years or older with a positive screen receiving brief intervention and referral to treatment	CCO Measure Specifications * <small>*Removed as a 2017 CCO incentive metric</small>	N/A	N/A
