

OREGON HEALTH CENTERS' RESPONSE TO COVID-19

As of April 22, 2022

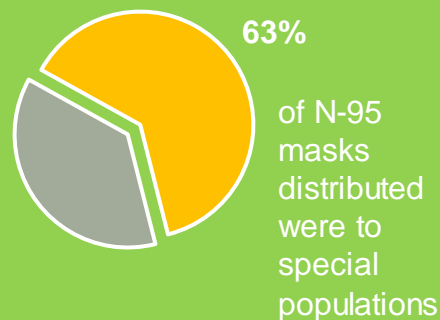

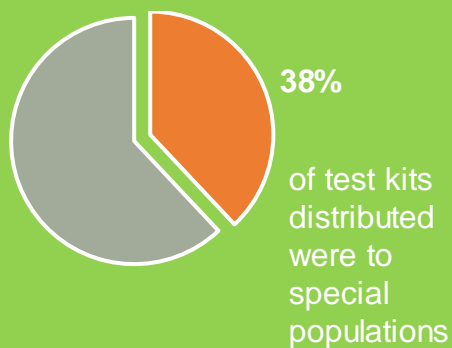

Community health centers are on the frontlines of the COVID-19 pandemic - finding innovative ways to test, vaccinate, and care for their patients and community through focused events and outreach to the most vulnerable Oregonians.

100,816
COVID-19 virus
detection tests
have been given

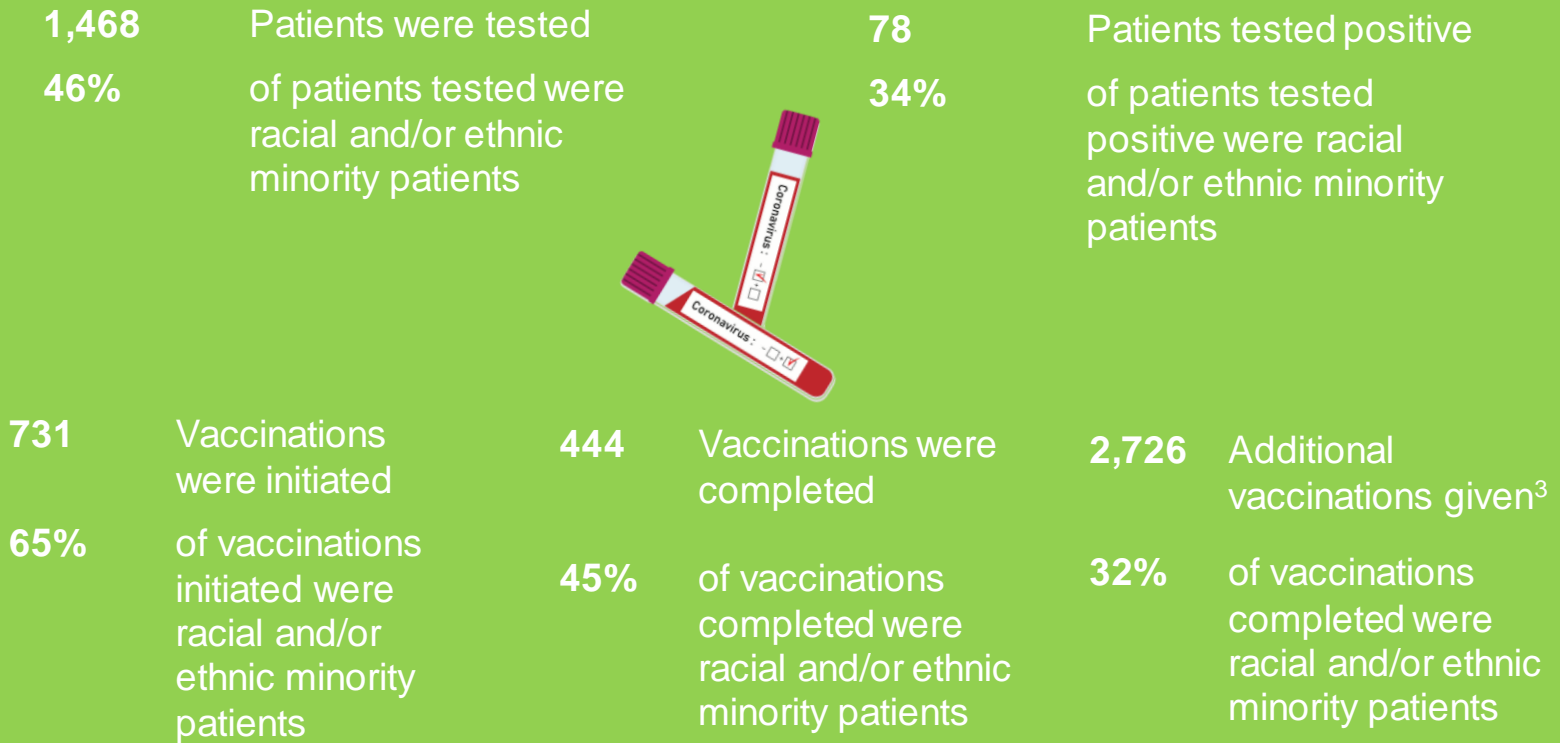

123,759
COVID-19
vaccination
series have
been
completed

13,605
COVID-19
additional
doses have
been given

This survey period, a total of **5,361 COVID-19 home test kits** and **3,903 N-95 masks** were distributed to patients, either through events or community partnerships:

Community Health Centers Continue to provide COVID tests and vaccinations to a diverse group of patients:

Health Centers evolve to meet the needs of their community by hosting special events to serve their patients:

Ongoing Health Center Operations and COVID-19 Challenges for This Week:

23% of health centers have challenges with health center staffing for vaccine administration

20% of health centers visits were conducted virtually

54% of health centers report COVID-19 test results have a turnaround time of 24 hours or less

Source and Notes: Data presented in this fact sheet come from the Bureau of Primary Health Care, Health Resources and Services Administration, Health Center COVID-19 Survey collected on **April 22, 2022**. **25 of 34** federally-funded health responded. Survey data are preliminary and do not reflect all health centers. Some duplication of patients tested from week to week may occur. For more information, please visit <https://bphc.hrsa.gov/emergency-response/coronavirus-healthcenter-data>.

1. Total reported refers to the number of respondents since the survey period starting on April 3, 2020.

2. Due to staff exposure, school closure, site/service closure, and other reasons.

3. This includes additional COVID-19 vaccinations or booster doses.

4. Number of health centers who reported this data for the time period.
