

## O&E Training Role Play Activity

### **Instructions:**

Form groups of three. Please form groups with people from other clinics.

Each group participant will play the role of the application assister, the client, and the observer one time.

Roles:

- Application Assister (OEWS)
- Client
- Observer

As a team, chose a case scenario to role play. You can select different scenario each time you go through this activity or the same one each time. You will have ~ 5 minutes to role play. At the end of each round, your observer will provide some feedback to the application assister before moving onto the next round. We will keep track of the time and let you know when to move into a new role.

Feel free to take notes in the space below when you are the Observer.

### **Observer Notes:**

What did the assister do well?

What could they do differently next time?

Any other observations?
