

Care STEPs

The definitions and guidance on when to document each Care STEP

New Visit Types

- Online Portal Engagement
- Health and Wellness Call
- Home Visit (Billable Encounter)
- Home Visit (Non-Billable Encounter)
- Advanced Technology Interactions

Education, Wellness and Health Promotion

- Care Gap Outreach
- Education Provided in Group Setting
- Exercise Class Participant
- Support Group Participant
- Health Education Supportive Counseling

Coordination and Integration

- Coordinating Care: Clinical Follow Up and Transitions in Care Settings
- Coordinating Care: Dental
- Behavioral Health and Functional Ability Screenings
- Warm Hand-Off

Reducing Barriers to Health

- Social Determinants of Health Screening
- Case Management
- Accessing Community Resource/Service
- Transportation Assistance

New Visit Type

Online Portal Engagement

- **Definition:** Patient and/or family communicate with members of the care team **using a web portal application within the electronic health record system** that allows patients to connect directly with their provider and care team securely over the internet.
- **Use:** This Care STEP should be counted when a message is sent from the patient or the patient's care team sends a message to them.

New Visit Type

Health & Wellness Call

- **Definition:** Health center provider or qualified health professional¹ **speaks to the patient or family/representative over the telephone** about health and/or wellness status to discuss or create care plan, treatment options, and/or health promotion activities (with the exception of tobacco cessation or maternity case management).
- **Use:** This Care STEP should be counted when health center staff member speaks with patient or family/representative **about health and/or wellness status AND discusses or creates care plan OR discusses treatment options OR discusses health promotion activities**. Standard clinical operations such as appointment reminders and calls supporting other administrative processes should not be recorded.

¹Tobacco cessation and maternity case management are excluded from this category because these types of telephone calls are billable encounters, as long as they include all of the same components of a face-to-face visit, in accordance with OAR 410-147-0120 Section 4. Retrieved from http://arcweb.sos.state.or.us/pages/rules/oars_400/oar_410/410_147.html.

New Visit Type

Home Visit Non- Billable

- **Definition:** Health center staff **visit the patient's home for reasons unrelated to assessment, diagnosis, treatment, or Maternity Case Management.** Non-billable home visits include but are not limited to:
 - » A community health worker visiting patient's residence to support the family or a clinical pharmacist visiting to assist with medication management and reconciliation.
- **Use:** This Care STEP should be counted upon completion of the home visit as defined in the definition section.

New Visit Type

Home Visit Encounter

- **Definition:** Health center staff conduct a **billable home visit**. The Division considers a home visit for assessment, diagnosis, treatment or Maternity Case Management as an encounter².
- **Use:** This Care STEP should be counted when a health center provider or other qualified health professional conducts a billable home visit at a patient's residence or facility for assessment, diagnosis, treatment, or Maternity Case Management.

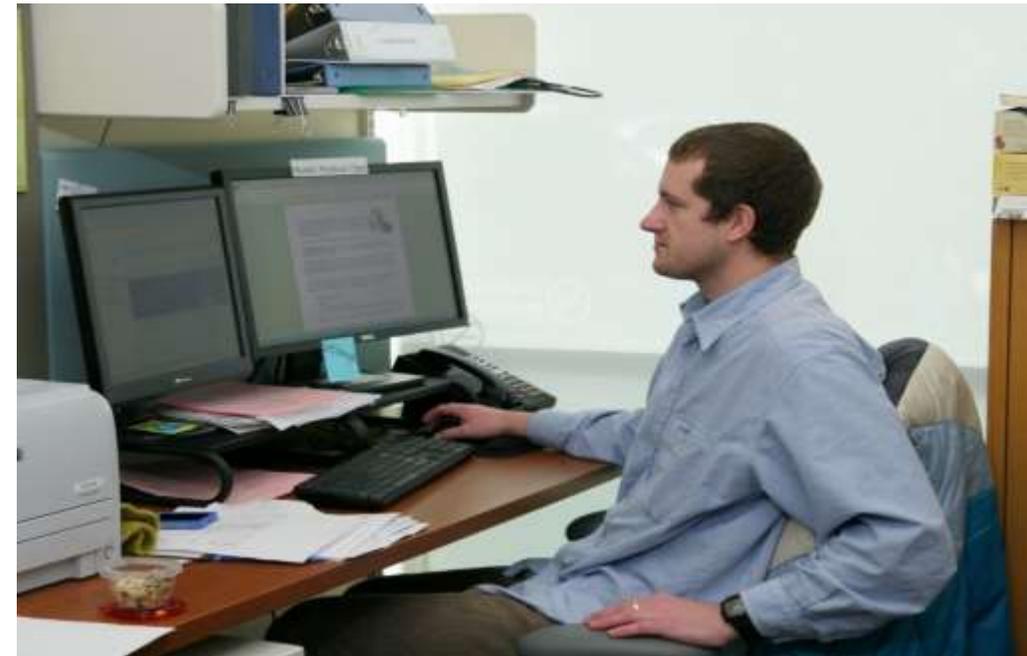

² Details relating to billable home visit encounters can be found in OAR 410-147-0120, section 10(n) and can be accessed at: http://arcweb.sos.state.or.us/pages/rules/oars_400/oar_410/410_147.html.

New Visit Type

Advanced Technology Interactions

- **Definition:** This Care STEP includes **telemedicine encounters**, as well as other types of interactions supported by **technologies not historically used for providing health care, such as text messaging or the use of smartphone applications** for remote patient monitoring or other health promotion activities.
- **Use:** This Care STEP should be counted when:
 1. Patient consultations using **videoconferencing**, a synchronous (live two-way interactive) video transmission resulting in real time communication between a medical practitioner located in a distant site and the client being evaluated and located in an originating site that is a billable telemedicine encounter according to OAR³ are conducted OR when a non-billable interaction between a member of the health care team and the patient using videoconferencing takes place.
 2. Health center staff uses a **non-traditional technology**, such as text messaging or smartphone application, to interact with patients regarding their health and wellness status OR discuss their care plan or treatment options OR provide health promotion based on the patient's health status or risk factors. Outreach efforts where the patient does not reply may not be counted.

³ Details relating to billable telemedicine encounters can be found in OAR 410-130-0610 and accessed at: http://arcweb.sos.state.or.us/pages/rules/oars_400/oar_410/410_130.html.

Education, Wellness, and Health Promotion

Care Gap Outreach

- **Definition:** Health center staff **identify gaps in care for their empaneled patients and speak with patients or family/representative** to help them access the appropriate health promotion, preventive or chronic disease management care and services.
- **Use:** This Care STEP should be counted when health center staff have spoken in-person or over the phone with patient or family/representative regarding gaps in care.

Education, Wellness, and Health Promotion

Education Provided in Group Setting

- **Definition:** Patient attends an **education group related to health promotion activities** (such as parenting/pregnancy classes, health fairs, and teaching kitchens/healthy cooking classes) provided by health center staff or affiliated group.⁴
- **Use:** This Care STEP should be counted when the health center **verifies that the individual patient attended the education class/event** provided by the health center or affiliated group. Verification may come from the patient.

⁴ The health center must have a contract, MOU or other written agreement with the affiliated group to establish access for health center patients in order to count services provided by the affiliated group in this Care STEP category.

Education, Wellness, and Health Promotion

Exercise Class Participant

- **Definition:** Patient attends an **exercise class** (such as a low-impact walking group, yoga, Zumba, or Tai Chi) provided by the health center or affiliated group.⁴
- **Use:** This Care STEP should be counted when the health center have **verified that the individual patient attended the exercise class/event** provided by the health center or affiliated group. Verification may come from the patient.

⁴ The health center must have a contract, MOU or other written agreement with the affiliated group to establish access for health center patients in order to count services provided by the affiliated group in this Care STEP category.

Education, Wellness, and Health Promotion

Support Group Participant

- **Definition:** The patient attends a **support group for people with common experiences** and concerns, who provide emotional and moral support for one another, hosted by the health center or affiliated group.⁴
- **Use:** This Care STEP should be counted when health center staff have **verified patient attended a support group** hosted by their health center or referred to by the health center. Verification may come from the patient.

⁴The health center must have a contract, MOU or other written agreement with the affiliated group to establish access for health center patients in order to count services provided by the affiliated group in this Care STEP category.

Education, Wellness, and Health Promotion

Health Education Supportive Counseling

- **Definition:** Services provided by a physician or other qualified healthcare professional⁵ to an individual or family, in which **wellness, preventive disease management, or other improved health outcomes are attempted through discussion with patient or family.** Wellness or preventive disease management counseling will vary with age and risk factors and may address such issues as family problems, social circumstances, diet and exercise, substance use, sexual practices, injury prevention, dental health, and diagnostic and laboratory test results available at the time of the encounter.
- **Use:** This Care STEP should be counted when health center staff engages in the activities described in the definition.

⁵Qualified health professional is any health care professional providing services within their scope of practice, either under their own licensure, or working under the supervision requirements of an overseeing provider's license. Definition retrieved from OAR 410-147-0120 Section 11, http://arcweb.sos.state.or.us/pages/rules/oars_400/oar_410/410_147.html.

Coordination and Integration

Coordinating Care: Clinical Follow-up and Transitions in Care Setting

- **Definition:** Health center staff **speaks with patient or family/representative regarding the patient's recent care at an outside health organization** (ER, hospital, long-term care facility, etc.) to:
 1. **Arrange a follow-up visit or other CARE STEP at the health center, or**
 2. **Speaks with patient to update care plan and educate on preventive health measures, or**
 3. **Assists patient with a transition in their care setting.**
- **Use:** This Care STEP should be counted when health center staff have verified the patient received or needs to receive health services from a different provider, and completed 1, 2, or 3 listed in the definition section.

Coordination and Integration

Coordinating Care: Dental

- **Definition:** During primary care visit, patient and health center **staff identify that patient has dental health care needs, and coordinates with dental professionals** by assistance with dental appointment set-up or follows up with patient about dental health care needs.
- **Use:** This Care STEP should be counted when health center staff have confirmed that the primary care provider **set-up a dental appointment and/or has followed up with the patient** about their dental health care needs.

Coordination and Integration

Behavioral Health and Functional Ability Screenings

- **Definition:** Health center staff facilitates the completion of standardized screening tools that **assess patient's needs or status relating to behavioral health, functional ability and quality of life** in order to organize next steps in a care plan. Screening tools include behavioral, mental health, developmental, cognitive or other functional screening tools, either through interview or patient self-administration of a screening form.
- **Use:** This Care STEP should be counted when completion of the screening process has been initiated to support care and service planning in collaboration with the patient.

Coordination and Integration

Warm Hand-off

- **Definition:** Health center provider or health professional conducts a **face-to-face introduction for the patient to a provider or health professional of a different health discipline** (e.g. primary care physician introduces patient to a behavioral health consultant or community health worker) ⁶.
- **Use:** This Care STEP should be counted when the patient is **successfully introduced** to the second provider or health professional.

⁶ Based on the SAMHSA-HRSA Center for Integrated Health Solutions definition of a Warm Handoff. Retrieved from <http://www.integration.samhsa.gov/glossary#w>.

Reducing Barriers to Health

Social Determinants of Health Screening

- **Definition:** Health center staff facilitate the completion of a **Social Determinants of Health screening questionnaire** with the patient, either through interview or patient-self administration of a screening form.
- **Use:** This Care STEP should be counted when the screening process has been initiated to support care and service planning in collaboration with the patient.

Reducing Barriers to Health Case Management

- **Definition:** Case management is a process in which a provider or another qualified health care professional⁷ is **responsible for direct care of a patient and, additionally, for coordinating, managing access to, initiating, and/or supervising other health, social or other kinds of services needed by the patient.** In order to use this Care STEP category, the health center must be able to identify who the assigned case manager is in the patient health record.
- **Use:** This Care STEP should be counted, **once a case manager is assigned to the patient,** for all interactions where the case manager directly interacts with the patient or family/representative relating to direct care, coordination of care, managing patient's access to care or initiation and/or supervision of other health care services needed by the patient.

⁷ Qualified health professional is any health care professional providing services within their scope of practice, either under their own licensure, or working under the supervision requirements of an overseeing provider's license. Definition retrieved from OAR 410-147-0120 Section 11, http://arcweb.sos.state.or.us/pages/rules/oars_400/oar_410/410_147.html.

Reducing Barriers to Health

Accessing Community Resource/Service

- **Definition:** Patient or family/representative is **educated on available resources in their community based on a presenting need** (such as assisting with immigration paperwork, finding domestic violence resources, obtaining legal services, medication assistance program registration, financial assistance, donations including clothing, infant supplies, medical equipment, prostheses, assistance finding employment, education opportunities, shelter) **AND health center staff refers or connects the patient to the resource/service.**
- **Use:** This Care STEP should be counted when health center staff educates the patient and/or family on available resources AND refers/connects the patient to the resource

Reducing Barriers to Health

Transportation Assistance

- **Definition:** Health center provides direct assistance to a patient by a staff member or contractor to arrange or provide transportation resources and services to reduce access barriers for the patient.
- **Use:** This Care STEP should be counted after staff identify patient has an access barrier in the realm of transportation AND delivers the resource/service that will reduce the transportation barrier.
