# ABOUT OPCA

The Oregon Primary Care Association (OPCA) is a non-profit membership association for the state's federally qualified health centers (FQHCs) and look-alikes. We generate data-driven insights into operational challenges, shape evolving health policy, and provide technical assistance to FQHCs and look-alikes in Oregon.

Our members deliver integrated primary, dental, and behavioral health services to more than 470,000 Oregonians. In addition community health centers work to help patients improve the circumstances of their lives and develop healthy behaviors through services like job training, literacy education, and connection to resources for affordable housing and healthy food.

## OPCA'S SIX STRATEGIC DOMAINS 2024 - 2026

# WELCOME

## Dear Friends, Members, and Partners,

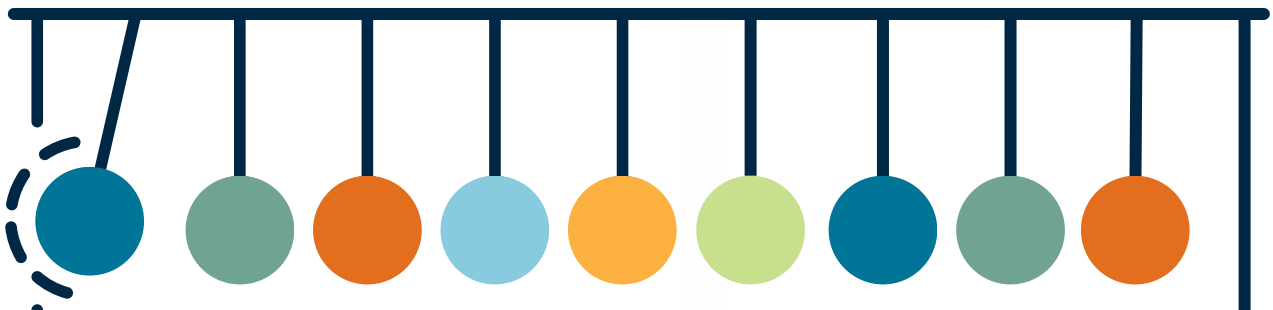

OPCA is now halfway through our three year strategic plan. While the path forward has been filled with surprises, our team has made steady progress that's quickly turning into momentum that will sustain our next phase of work.

As you'll see in the following pages of this report, each department at OPCA has accomplished something extraordinary over the past fiscal year.

First, our Alternative Payment and Advanced Care Model (APCM) has always been about measuring what matters. In 2025, we took more than a decade of data-driven insights and our value-based pay philosophy into a new format for use beyond our clinics. Our Care STEPs model is now in use by CareOregon. It's a breakthrough not only in care delivery, but in how we recognize, reward, and replicate what community health centers do best.

Our Policy team has been busy shaping state and federal law. In just two years, we've grown from co-authoring our first bill to advancing three and passing two this session. Right before the 2025 legislative session ended, OPCA's bills, HB 2385 and HB 3409 became law and further protect CHCs' 340B benefits. Beyond Oregon, our member CHCs showed up in force at Washington DC this year for PNI, where CHC leaders came to speak with national leaders about the importance of supporting community-based health.

Our Programs team also brought unprecedented energy to member engagement this year. We held our second annual conference bringing together our members and partners from across the state and nation for innovative learning and conversation. We also continued offering training and technical assistance to support health centers in a wide range of areas including, but not limited to, value-based care, operations, compliance, workforce, and clinical skills, including HIV/STI prevention. We also convene leadership and affinity groups for our members to build meaningful collaborations that drive quality improvement and statewide innovation.

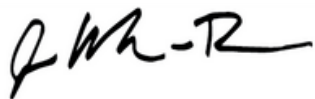

Our subsidiary, the Oregon Network of Community Health Centers began in 2020 and is now a full-fledged health data ecosystem. With all 15 participating health centers fully onboarded and a federally approved ACO, Oregon's CHCs finally hold the keys to their own data and their own future.

Internally, our HR department has demonstrated that retention begins at the interview table. And our Finance team ensured we grew not just in size, but in sustainability, with more diversified funding and smarter operations to match our ambitions.

At OPCA, we're not waiting to be invited to the table — we're setting it. And we're making sure Oregon's community health centers have a seat, a voice, and the data to lead the conversations.

Thank you for walking this path with us. The road to a healthy Oregon is long, but we are making significant progress together.

Yours in solidarity,

Joan Watson-Patko  
OPCA Executive Director

# POLICY

## FROM THE CLINIC TO THE CAPITOL

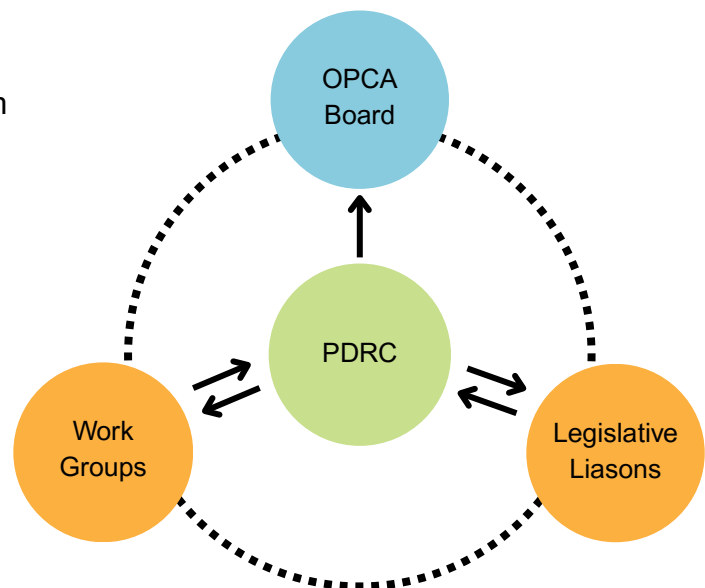

### Doubling our Legislative Impact Through a New, Member-Led Committee

*Policy momentum takes more than meetings. It takes trust, strategy, and a unified voice. In just two years, OPCA's policy team has gone from supporting legislation to shaping it. This year, that momentum produced real protections for Oregon's CHCs and the patients they serve.*

In 2023, OPCA's first-ever bill, SB 608, became law and resulted in pharmacy dispensing fees for FQHCs increasing from \$14.30 to \$20.86 in fee-for-service Medicaid prescriptions. This victory helped inspire our members to get more invested than ever in the legislative outcomes and processes.

In 2024, OPCA launched the Policy Development, Research, and Review Committee (PDRC) to quickly gather information and form consensus with member health centers about how to address emerging policy issues as a unified voice.

This new committee reviews, analyzes, and makes recommendations to the OPCA Board of Directors on legislative issues related to health care, public health, related social policies and regulatory changes and more. PDRC members also work collaboratively with OPCA's professional groups and legislative liaisons to get a clear view of issues facing Oregon CHCs.

When members engage, OPCA embraces the momentum. With PDRC support, **OPCA authored three bills this session and two became law!** Both of the passed bills protect Oregonians' access to affordable medications and safeguard the federal 340B Drug Pricing Program.

# BEYOND OUR CORE AGENDA

## SELECT BILLS OPCA SUPPORTED OR OPPOSED

BILLS OPCA SUPPORTED	STATUS
<b>Expand Investment in Healthcare Workforce</b>  SB 27 + SB 283 – Included a \$9 million investment in workforce recruitment and retention efforts at FQHCs	<b>Failed</b>  
<b>Support for School-Based Mental Health Services</b>  HB 2729 – Directed OHA to establish a grant program expanding school-based mental health and substance use services; included a study on reimbursement models for mental health services delivered by school-based health centers.	<b>Failed</b>  
<b>Ensure Sustainable Funding for School Health Centers</b>  HB 3169 – Required annual grant funding for school-based health centers to be adjusted for inflation.	<b>Failed</b>  
<b>Restrict Flavored Tobacco Products</b>  SB 702 – Aimed to curb youth vaping by banning the sale and distribution of flavored tobacco and inhalant delivery products, with limited exceptions.	<b>Passed</b>  

BILLS OPCA OPPOSED	STATUS
<b>Pilot Telehealth Programs in Schools</b>  HB 2577 – Proposed a pilot program to evaluate the impact of school-based telehealth on student access to care. However, it was written in such a way that no school-based health center in the state would have qualified for funding.	<b>Failed</b>  
<b>Address Gaps in Dental Reimbursement</b>  HB 2597 – Sought to raise Medicaid dental capitation rates; however, FQHCs would not have benefitted due to the PPS reimbursement structure.	<b>Failed</b>  

# LEGISLATIVE SESSION STATS

**TOTAL BILLS**  
3,385 INTRODUCED  
669 PASSED

**OPCA TRACKED**  
**306 BILLS**

OPCA WROTE **3 BILLS**, **2 PASSED**

OPCA SUPPORTED **4 BILLS**, **1 PASSED**

OPCA OPPOSED **2 BILLS**, **BOTH FAILED**

## BIG WINS FOR OREGON CHCS

*Two bills championed by OPCA and Oregon's health centers, HB 2385 and HB 3049, passed. This marks a major step forward in protecting the integrity and financial viability of the 340B program.*

**HB 2385 prohibits restrictions on the use of contract pharmacies in the 340B program.**

This bill enshrines into Oregon law critical protection for FQHCs, ensuring they can continue using contract pharmacy arrangements to serve their patients.

**HB 3049 prevents PBMs and manufacturers from requiring FQHCs to use unique claims identifiers.**

Claims identifiers are an administrative burden often used to deny 340B claims or redirect savings. This bill reinforces health centers' ability to operate the 340B program effectively and without unnecessary barriers.

*These bills represented more than policy victories: they were an opportunity to amplify our voices, teach lawmakers about our mission, and highlight the unique challenges FQHCs face within the broader healthcare system. Our success underscores the strength of coordinated ongoing advocacy.*

## OPCA & MEMBERS' DAY AT THE CAPITOL

We met with electees from **65** legislative districts, including:  
**14 SENATORS & 41 REPRESENTATIVES**

# APCM

## MILLION+ STEPS TOWARD BETTER CARE

*OPCA's Alternative Payments and Advanced Care Model (APCM) has served patients and providers at CHCs for more than a decade. Now, at the request of Coordinated Care Organization (CCO) CareOregon, OPCA is building the lessons of APCM's Care STEPs into a new product for non-members. OPCA's latest venture in payment innovation enables CareOregon to adopt APCM's strategies across Oregon's health landscape. In the future, OPCA plans to bring Care STEPs to more CCOs for an even greater impact.*

### WHERE WE STARTED: APCM Brings Better Health at Lower Costs

In 2013, OPCA, the Oregon Health Authority (OHA), and Oregon's Federally Qualified Health Centers (FQHCs) built a bold new approach to healthcare delivery: the Alternative Payment and Advanced Care Model (APCM). Designed to align payment with the actual value of care delivered, APCM shifts the focus of health care billing from the volume of patients' visits to the quality of care delivered. This approach empowers health centers to meet patients' needs through team-based, innovative, and often non-traditional services.

APCM incentivizes health centers to focus on helping people stay healthy, not just treating people when they're sick. Services like personal and group wellness education, dental and behavioral health referrals, and screenings for chronic health conditions all help patients build a foundation for long-lasting health.

The quest for the perfect balance between health outcomes with service costs continued as OPCA and participating health clinics worked together to aggregate data and share best practices which consistently led to better health outcomes for patients.

### WHAT WE LEARNED: 18 Provider Actions Consistently Created Better Outcomes for Patients

By 2017, OPCA's APCM team formalized a new way to document and recognize the spectrum of services needed for population health: Care and Services That Engage Patients, aka Care STEPs. OPCA built the STEPs with OHA's approval and with coordination from OCHIN.

A Care STEP is a direct interaction between a patient (or their family/representative) and a health center team member. Care STEPs can be grouped across four categories: new visit types; education and wellness; care coordination; and barrier reduction. The Care STEPs model ensures that prevention, outreach, and accessibility-focused work count just as much as clinical encounters.

## WHERE WE'RE GOING NEXT: OPCA is Preparing to License Care STEPs to More Organizations to Meet Statewide Health Goals.

In 2024, CareOregon piloted the use of Care STEPs as an incentive metric. CareOregon is working with select FQHCs to track patient engagement and access, as both are critical components of value-based care (VBP). This pilot aims to determine how Care STEPs can support statewide VBP policies.

OPCA created a special onboarding program for non-APCM teams in support of this effort. At the same time, OPCA's Accountability Workgroup is continuing to strengthen the data infrastructure that underpins APCM and VBP efforts. This ensures that every Care STEP delivers a meaningful patient interaction and advances the larger, data-informed push toward better care and smarter spending.

With Care STEPs on the verge of becoming a license-ready product, OPCA plans to bring this innovation to new partners and payers as a scalable solution.

More than one million steps later, the path ahead is clear: supporting and documenting meaningful interactions between providers and patients improves overall population health while also decreasing costs through a focus on prevention.

*The collaborative efforts between OHA, OPCA, and CHCs over the past decade in the APCM space enabled us to identify measurable, meaningful impacts on patients' lives.*

*Now, that work is the data-backed foundation for further improvements to Oregon's health care safety net.*

Interested in joining APCM and/or utilizing Care STEPs? Contact Danielle Sobel ([dsobel@orpca.org](mailto:dsobel@orpca.org))

### STRATEGIC GOAL #2

*Advance Care & Payment Models that support the evolving needs of Oregon's CHCs.*

# PROGRAMS

## 2024 - 2025 EVENTS AND TRAININGS AT A GLANCE

OPCA offers a comprehensive suite of programs that support Oregon's community health centers in delivering high-quality, whole person care. Our work aligns with federal HRSA expectations while remaining responsive to the changing needs of our members, bolstered by grant funding and strong cross-sector partnerships.

We focus on core areas such as behavioral health integration, workforce development, value-based care, and system transformation. Through targeted training and technical assistance, we create opportunities for shared learning and practical solutions. Our statewide programs are designed to foster innovation, strengthen collaboration, and advance the collective capacity of Oregon's FQHCs.

# EXPLORE OPCA T/TA RESOURCES!

## Leadership Groups

OPCA convenes 12 groups throughout the year that meet for learning and discussion around shared topics of interest. These groups include a Quality Improvement Collective and Population Health Workgroup that focuses on metric management and best practices sharing using health center data and case studies.

## Value Based Care Collective

OPCA offers a suite of value-based pay (VBP) training and resources, including a newly launched resource repository. This year, in addition to our APCM Forum, which was for APCM member clinics only, we held 3 additional VBP trainings that were open to all OPCA members. These trainings focused on population health management and care team integration.

## Health Center Operations

### Workforce Program

- Leadership Trainings
- Staff Safety Trainings
- Health Professions Education & Training Pilots
- Career Pipelines Convenings

### Health Center Compliance

- Emergency Preparedness Annual Convenings
- Support for expanding sites and/or services
- Group Purchasing

## Clinical Improvement Community

- HIV/ STI Prevention Program
- Annual Cancer Screening Training
- Quality Improvement Collective
- Annual Provider Communications Trainings – Certificate Training to meet PCPCH Requirement 6.E.0
- Polysubstance Use Disorders Workgroup for FQHCs
- Annual Intimate Partner Violence Screenings
- Maternal Health Strategy Sessions
- Diabetes & Oral Health Screening & Metrics

## AVAILABLE NOW: Leadership Resources Repositories

OPCA has launched four new resource repositories on our Member Portal. CHC employees can login to OPCA's member portal at [orpca.org](http://orpca.org) to access the following repositories:

- Leadership Resources
- Emergency Preparedness Resources
- Board of Directors Resources
- Value Based Pay Resources.

# ANNUAL CONFERENCE

OPCA's 2025 Annual Conference theme, Mobilizing Health Care Transformation, focused on actionable initiatives to improve health outcomes and transform healthcare systems for all Oregonians. Attendees included key decision-makers and partners from local and national health centers, with sessions featuring OPCA-led training and advocacy opportunities. This year was our biggest conference yet, with four days of programming for attendees!

Conference guests were encouraged to follow one of three focus tracks for breakout sessions: Clinical Innovations, Operations and Leadership, and System Transformation.

## Keynote and Plenary Speaker Spotlight

Dr. Erin Taylor

Oregon  
Perinatal  
Collaborative

OPCA celebrated the 2025 recipients of our Annual Awards of Excellence on the first evening of the Annual Conference.

OPCA members gathered at the state capitol to meet with legislators on the last day of our Annual Conference.

# PROGRAMS

## ADVANCING MATERNAL HEALTH THROUGH A NEW, NATIONAL INITIATIVE

In January of this year, HRSA announced a “Landmark Year of Enhancing Maternal Health,” and allocated \$19 million nationally to health providers and partners to study and identify key drivers of maternal mortality.

At the Annual Conference, OPCA launched the new Oregon Maternal Health Collaborative. The kickoff session brought together CHC health providers to gain a shared understanding of the issues and begin envisioning best practices that can be implemented statewide. The Oregon Perinatal Collaborative kicked off the day with a keynote presentation. Notably, a sampling of Oregon’s 2018-2021 maternal deaths revealed that of 32 pregnancy-related cases, 72% of those deaths were potentially preventable (compared to 80% nationally).

The kickoff meeting included feedback from four CHCs, OHA, the Oregon Perinatal Collaborative, Willamette Health Council, and Comagine Health. OPCA is now working on an environmental scan to build the full picture of maternal health at Oregon FQHCs. The results of this scan will inform content for an upcoming maternal health symposium in 2026.

### STRATEGIC GOAL #3

*Build CHC capacity for effective population health through increased engagement, quality improvement, data & analytics, and shared programming.*

# OPERATIONS

## Keeping Humans Central in Human Resources

### The OPCA Human Resources' Unique Approach to Hiring Brings in and Retains High-Quality Staff

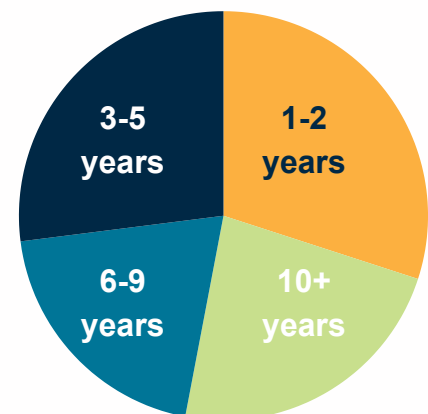

*People power momentum. That's why OPCA has made empathy-centered hiring and long-term staff support a cornerstone of our organizational strategy. We know that the best way to serve our members is by first building a thriving internal team.*

For each interview, we provide candidates with a copy of the interview questions the night before, a guide on how to best share their experiences, and OPCA's values. While sending interview questions the night before may seem unusual, we've found it's the best way to alleviate some job interview jitters and ensure our candidates come prepared to share their selves.

Additionally, on the day of the interview, we provide candidates with a hard copy of the questions to help keep them grounded throughout the interview. Small acts of intention and care in the interview process not only help the candidates perform better - these steps also introduce potential future employees to what kind of environment they can expect to join.

Empathic interviewing ensures both the candidates and OPCA put our best feet forward in the hiring process, and our retention rates demonstrate the success of our approach.

70% of OPCA's staff have been with the organization for 3 years or more.

### STRATEGIC GOAL #4

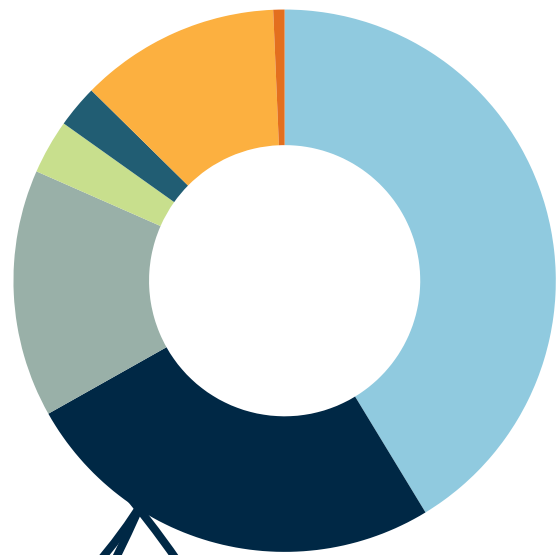

*Develop and support an engaged workforce to meet current & emerging needs, reflecting communities we serve.*

# FINANCE

*Every leap we made this year was made possible through a solid financial foundation. OPCA's finance team ensured that our growth was supported through increasingly diversified revenue sources, improved operational efficiency, and new strategic partnerships.*

## OPCA REVENUE SOURCES

	HRSA	\$1,956,325	41%
	Other Grants & Contributions	\$1,209,339	26%
	Membership Dues	\$699,180	15%
	APCM Assessment	\$153,500	3%
	Trainings	\$120,000	3%
	Intercompany	\$565,925	12%
	Interest and Misc	\$31,836	1%

## GRANT HIGHLIGHTS

\$807,433 for the HIV/STI Program

\$177,083 for HRSA Grant for Maternal Health

OREGON  
HEALTH  
AUTHORITY

\$74,967 OHA grant for data collection project

### STRATEGIC GOAL #6

*Build robust operational and financial organizational infrastructure*

## OPCA NEARLY DOUBLED CONFERENCE SPONSORSHIPS TO REDUCE COSTS FOR MEMBERS

This year's Annual Conference offered rich educational offerings AND financial sustainability. The OPCA Programs team raised \$75,000 in sponsorships, nearly doubling last year's total of \$36,000. These funds enabled OPCA to offer ticket discounts and need-based scholarships to CHC staff, while great attendance helped build momentum for statewide collaboration.

# THE NETWORK

## A Data Platform For Health Centers, By Health Centers

**OPCA and the Network are building digital infrastructure for Oregon's CHCs to have the insights they need to deliver optimal care at low costs.**

For several years, the Oregon Network of Community Health Centers has been building the foundation for a missing piece in the CHC landscape: a data platform owned and governed by the health centers themselves.

"In so many statewide initiatives around the nation, we saw data systems built around the needs of insurers or external administrators," said Network Director Carla Jones. "This time, we said: what if the health centers got to decide what mattered?"

In 2023, the Network began building a platform specifically designed to empower CHCs to succeed in a value-based care environment. Now, every single one of the 15 health centers that signed up for the platform has successfully onboarded their staff members into the new system. Onboarded staff members underwent extensive trainings to understand how to properly upload, access, interpret, and protect patient data.

Participating clinics now have access to a growing trove of insights. The platform stores multiple types of patient information, i.e. Medicare status, emergency department usage, and electronic health record (EHR) data. By storing multiple record types into a single, high-end software, community health centers can get a much clearer sense of their patients' and their communities' needs.

### More Ways to Save: Join the ACO

Last year, the Network received federal approval to form an Accountable Care Organization. If you missed out on the initial enrollment period, don't fret! The Network is accepting new participants between now and August 15, 2025.

The ACO is a low risk opportunity to maximize savings earned for your Medicare Fee For Service patients.

Benefits include:

- Collective contractual arrangement with fellow members to secure better rates from payors.
- Assistance with transforming or advancing your clinics for optimal VBC and ACO infrastructure.
- Expert support with ACO operations and data analytics. PLUS access to best practices and learning with fellow members.

ACO Members have access to centralized population health tools including:

- Ability to manage the MSSP patient outcomes and performance in one place
- Care gaps identification
- Risk recapture
- Patient costs analysis
- Clinical quality metric performance
- Care Coordination and Case management

The Network's ACO is all about:

- Better care
- Better outcomes
- Lower costs
- Happier providers

*To join, contact Carla Jones ([cjones@orpca.org](mailto:cjones@orpca.org))*

*“Accountants and policy leaders need data to understand the value of what we do. However, Oregon’s health centers didn’t have the infrastructure to collect, analyze, and use that information themselves to improve patients’ health outcomes. Now, we do.”*

*– OPCA Data Director Simon Parker-Shames*

The data platform also hosts critical information for the Network’s Accountable Care Organization (ACO), which received federal approval in early 2024. With five years of Medicare data covering more than 10,000 patients and comprehensive EHR data from 12 Network member clinics, the ACO is also on strong footing to better understand their patients and deliver optimal care.

Next, the Network plans to expand partnerships with payors like OCHIN and bring in data from the Alternative Payment and Advanced Care Model (APCM) program to further strengthen population insights and performance evaluation.

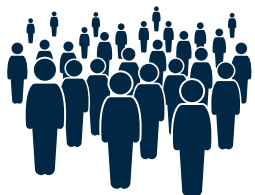

By the end of the CareOregon contract period, the Network aims to have EHR data from every participating clinic housed within the platform. This next milestone will pave the way for smarter care delivery and more accurate payment models.

CareOregon’s Chief Medical Officer Dr. Amit Shah sees this project as essential. “A stronger Community Health Center Network means better health outcomes and improved health access across Oregon. That’s why CareOregon is proud to partner with the Network. As the Oregon Network grows, so will our collective impact.”

Already, the benefits are tangible. Onboarded health centers can use the platform to stratify the data they collect as part of their work with OPCA’s Quality Improvement Collective (QIC) to identify disparities and implement community-led interventions. Members of the QIC already reports above-average scores across nearly every major quality metric, including colorectal screening, urgent care access, and chronic condition management like diabetes and hypertension.

“It’s not just about metrics; it’s about impact,” said Jones. “Participating health centers report strong improvements in behavior change and confidence scores, underscoring the real-world value of having the right data, in the right hands, at the right time. As Oregon’s community health centers continue to move from volume to value, the Network’s new data platform is a major turning point.”

# MEMBERS' IMPACT

**471,795**

# ANNUAL AWARDS

Since 1988, OPCA has recognized more than 200 Community Health Center innovators who went above and beyond to support their patients and colleagues. By highlighting the inspirational stories of excellence in Oregon's Community Health Centers, OPCA celebrates the values which guide community and state transformation of primary, dental, and behavioral health care. When we learn how somebody made a difference in their community, we also learn important practices for replicating their results.

## Congratulations to Our 2025 Winners!
